

Working for Unico

IT Graduate opportunities at Unico

About us

Unico is a successful, rapidly growing, independent Australian IT company employing over 150 staff. We provide software development and IT professional services for some of the largest tier-one companies in Australia, across a range of industries. Our focus is on providing smart, tailored solutions to our clients that enable development, connection and integration of their core, complex IT systems.

Unico has been a technology leader for over 25 years and we are currently experiencing unprecedented growth.

Remuneration and rewards

Unico offers a great blend of professional development, financial and non-financial rewards, and a positive supportive work culture.

- › Competitive market salaries
- › Culture of continuous learning and development
- › Free yearly travel card
- › On-site gym/fitness classes
- › Subsidised on-site osteopath
- › Social Club – regular function and activities
- › Great location – close to Albert Park, Fawkner Park, Melbourne Aquatic Centre, St Kilda Rd public transport, the Botanical Gardens and CBD
- › Flexible working hours
- › Unico Community Fund, broadly targeting social disadvantage, the environment and the arts. Pre-tax staff donations are matched by Unico dollar for dollar.

Our Graduate Programme

At Unico you will have the opportunity to work with state of the art technologies and work on interesting, high-visibility projects as part of a friendly and highly talented team.

Unico's Graduate Programme ensures that you experience the full breadth of our operations by providing you with a rotational development plan for the first 12 months of your employment. Commencing with a comprehensive induction and training programme you will then undertake work in various departments which span all aspects of the software development lifecycle, such as development, testing, operational support and our Internal Support Group.

At the successful completion of the developmental and rotation programme we will match your skills, talent and area of career interest with a role in one of the key areas within the business. Of course, that is not the end of your professional development within Unico. We provide a culture of continuous learning, development and career growth opportunities.

Our ideal graduates

We employ graduate Software Engineers/Developers, Software Testers, Operational Support Engineers and Network/System Administrators. Ideally, you will have:

- › A high academic average
- › Excellent written and verbal communication skills
- › Initiative, ambition, attention to detail, a desire to learn, and a team spirit
- › Work or university project experience in programming, testing, support or systems administration
- › Knowledge/study in areas such as Unix/Linux, Networks, Java, J2EE, C++ or other OOD. Familiarity with databases, particularly Oracle 9i & 10g and SQL will be highly regarded
- › Understanding of software engineering principles (i.e. the software development lifecycle, quality management, etc.)

Unico employs graduates from degrees in IT, Software Engineering, Computer Science or Telecommunications Engineering. We are also open to graduates from other disciplines who wish to work in the ICT industry.

How to apply

To apply for a graduate position, simply download the Graduate Application form from our website and email it together with your resume and a copy of your results to careers@unico.com.au.

Applications welcome. For more information, and to check closing dates for applications, please visit our website at www.unico.com.au/careers/graduates.
